

RAY TABER FOUNDATION “ANNUAL FREE DRILL CLASS”

WHEN: FEBRUARY 25, 2022, 9AM-4PM

WHERE: 20798 County Road 81

TABER RANCH, CAPAY VALLEY

Join us for field demonstrations of solid and hollow auger drilling, mud rotary drilling, electronic testing such as CPT, and geotechnical sampling.

Our generous sponsors provide drinks, breakfast snack items, and lunch.

Please bring a hard hat and safety vest if you have one. If not, you will be able to borrow them (although our supply is limited!). Additionally, please dress prepared for field-weather conditions such as cold, rain and mud.

Due to health and safety concerns, we ask that everyone attending be either fully vaccinated against COVID or have a negative COVID test no later than three days before the seminar. If you are feeling unwell, please do not attend and let Meredith Young, myoung@raytaberfoundation.org, know as soon as possible so someone else can attend the Class.
